

	<b>Thickness &amp; GSM Test Report</b>	Doc. No.:	EEPL/QA/IPQA/F/06
		Revision No.:	01
		Revision Date:	01.04.2021
		Page No.:	1 To 1

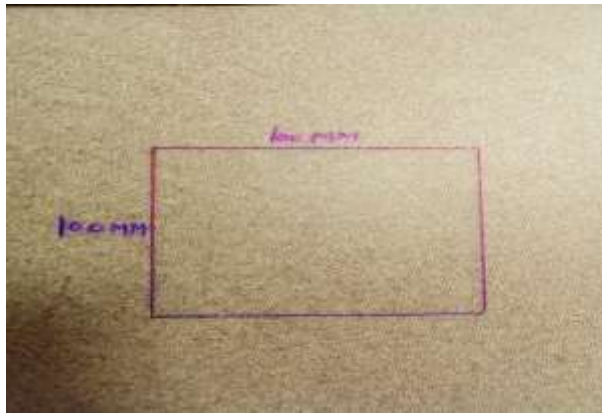

**Test:** The thickness of a single-layer film can be measured easily using a **Micrometer/Thickness gauge**

**Accepted Criteria:** -  $520 \pm 20 \mu$

**Fig. : Thickness Test of EVA Film**

**Test:** The term “GSM” stands for “grams per square meter.” For this standard, the weight of EVA film is **measured from a sample sheet cut to one square meter in size**. No matter the length or width the film becomes, the weight measurement is always taken from the square meter film.

**Accepted Criteria:** As per Customer requirement.
